

Greenwich October 24: On July 7, more than fifteen weeks ago, Castor's TD 3 Predictor projected WS rate (red line in graph) for the next six months. It included following predictions:

- A) *Forecast July 7: TD3 will decline during the next eight weeks until August 30 and on that day record its lowest rate for 2017 at WS37.87.*
- B) Actual: One day later on August 31 TD3 reached its lowest level for the year at WS38.63.

- C) *Forecast July 7: On October 19 TD3 will pause and weaken for the next few days.*
- D) Actual: One day ahead of forecast, TD3 weakened on October 18.

- E) *Forecast July 7: On October 26 TD3 would again strengthen.*
- F) Actual: Two days ahead of forecast, TD3 began to strengthen on October 24.
